The synthetic risk indicator shows the level of risk of this product compared to others. It indicates the probability that this product will suffer losses in the event of market movements or our inability to pay you.

We have classified this product in risk class 2 of 7, which is a low risk class. This means that potential losses from future product performance are low and, should market conditions deteriorate, it is very unlikely that our ability to pay you will be affected.

Other important risk factors not adequately covered by the indicator :

Credit risk: Risk of deterioration in credit quality or risk of default by an issuer that could negatively impact the price of the assets in the portfolio.
