The synthetic risk indicator shows the level of risk of this product compared to others. It indicates the probability that this product will suffer losses in the event of market movements or our inability to pay you.

We have classified this product in risk class 3 out of 7, which is a low to medium risk class. This means that the potential losses associated with the future performance of the product are low to medium and, should market conditions deteriorate, it is unlikely that our ability to pay you will be affected.

Other important risk factors not adequately covered by the indicator :

Credit risk: Risk of deterioration in credit quality or risk of default by an issuer that could negatively impact the price of the assets in the portfolio.
